¹ For Price series, return is calculated as Price(period end)/Price(period start)-1. For Yield series, return is calculated as Yield(period end) - Yield(period start).

² Total Return (%) is calculated on a NAV-to-NAV basis with distributions re-invested on the ex-date. For cross-listed funds, published NAVs from the main listing are converted to AUD at prevailing spot rates. For ETFs that do not publish daily NAVs or have not published NAVs on Bloomberg as at the publication time, last traded price is used as a proxy for any unavailable NAVs. Total returns are quoted on a per annum basis for periods exceeding one year.

³ Indicates an ETF that does not publish a daily NAV or does not have a published NAV on Bloomberg as at the publication time. Last traded price is used as a proxy for NAV.

⁴ Excludes cross-listed ETFs that report flow data monthly to the ASX.

⁵ MER is the quoted management expense ratio of the fund.
