MFF further increases net cash weighting

Net cash as a percentage of investment assets and net cash in **MFF Capital Investments Limited (MFF)** increased to 33.9% as at 17 April and had grown to be the largest position in MFF after being 3% at the end of February. We estimate that approximately 70% of the portfolio is currently weighted towards net cash and investments in Visa Inc and MasterCard Inc. Both those companies are expected to report March quarterly earnings this upcoming week. The flexibility of the investment mandate allows the Manager a near unconstrained ability to position the portfolio to take advantage of market conditions. Tax payments continue to be the largest expense of MFF and regular payments decrease the pre-tax NTA. Importantly, this is the outcome of profitable investments and corporate tax paid increases the imputation credits that will inevitably be passed through to shareholders through fully-franked dividends.

Figure 1 - MFF change in net cash

Asian exposure via LICs

Figure 2 highlights the 3 Asian LICs in this report. Despite the pre-tax NTA return outperforming the benchmark by 4.7% during the first quarter, **Platinum Asia Investments Ltd (PAI)** widened out to a 14.3% discount. These levels are an attractive buying position for a diversified portfolio of large Asian companies, led by Tencent and Alibaba.

BELL POTTER

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LICs underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA^A and adjusted discount^A, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.
