## SEC buyback and other initiatives

**Spheria Emerging Companies Limited (SEC)** provided an update on the LIC's share buyback and other initiatives aimed at reducing the NTA discount of the Company. SEC previously implemented a \$5m buyback program in June 2019 that is nearing the end, with \$4.5m having been bought back as at the most recent company disclosure. The update from the Company stated the buyback purchases have thus far been completed at an average discount to NTA of 16% which have been accretive to the NTA per share by more than 0.6%. SEC was trading at a discount to the pre-tax NTA of ~14.3% as at 27 March 2020.

In a commitment to continue to do more in relation to the continuing discount, SEC has decided to buyback a further \$2.5m shares. This equates to 3.4% of the current market cap of the Company.

SEC also made reference to an opportunity arising from LIC consolidations that they expect to occur over the next couple years in the aftermath of the equity sell-off occurring. The Company stated it is preserving capital for an expected period of sector consolidation and that has weighed into the decision to not have come out with a larger buyback program.

Finally, SEC will be moving to daily NTA disclosures in the near future and increase the disclosure of monthly security holdings from the top 5 to the top 10.

## Metrics Credit Partners fund upgraded by S&P

On 31 March the Metrics Credit Partners Diversified Australian Senior Loan Fund (DASLF) was upgraded from BBB+ to A- by S&P Global Ratings. Approximately 60% of capital invested in **MCP Master Income Trust (MXT)** is invested into the unlisted DASLF. In the announcement, S&P highlighted the "very strong risk-adjusted leverage and low under-lying credit risk profile relative to peers and solid franchise among target investors". S&P also noted that since DASLF's inception in June 2013, the fund hasn't experienced any materially impairments to the portfolio.

MXT aims to provide exposure reflecting activity in the Australian corporate loans market with diversification by borrower, industry and credit quality.

## BELL POTTER

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LICs underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA<sup>A</sup> and adjusted discount<sup>A</sup>, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

Chart 1: 3 Year Pre-Tax Performance v Standard Deviation

Source: IRESS, Bell Potter Estimates

Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking.

Chart 2: 5 Year Pre-Tax Performance v Standard Deviation

Source: IRESS, Bell Potter Estimates

Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking.
